

Maryland Inventory of Historic Properties

Addendum

MIHP Number: WA-II-154

Property Name: Stuccoed Stone Farmhouse
Property Address: 10206 Mapleville Road (MD-66)
Hagerstown vicinity, Maryland

Survey Date: April 2007

This Maryland Inventory of Historic Properties (MIHP) Addendum was prepared in accordance with the Memorandum of Agreement (MOA) negotiated among H.B. Mellott Estate, Inc., the Water Management Administration Mining Program Maryland Department of the Environment, and the Maryland Historical Trust. A stipulation of the MOA required that an MIHP Addendum be prepared for each of the 14 properties nearby to the John Lung Farmstead (WA-II-149), which have a history or potential significance similar to the John Lung Farmstead.

This Addendum includes the property name, address, MIHP number, and a brief, one-to-two sentence comment on the property's condition, and one or more black and white photographs. Each photograph was printed in accordance with the photography requirements of the Maryland Historical Trust. The field survey and photography were conducted from the public right of way.

As of April 2007, the agricultural outbuildings described and photographed in the MIHP form were no longer extant. The outbuildings appear to have been replaced by an open pole barn and concrete silo. From the public-right-of-way, it appears that the south half of the house was removed and the stucco removed from what remained of the building. A one-story, modern addition was constructed to the north end of the remaining stone house.

ABSTRACT

WA-II-154

Early 19th Century

Stuccoed Stone Farmhouse

Hagerstown Vicinity

private

This farm complex which includes a stuccoed stone house, a frame bank barn and other frame outbuildings is an example of a 19th century rural group. The house shows evidence of having been built during the early 19th century and of having had renovations during the later 19th and 20th centuries. The stuccoed surface of the stone house was not an uncommon treatment in this region during the 19th century. The outbuildings appear newer than the house.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This farm complex is located at the end of a private lane which extends in a westerly direction from Maryland Route 66 just south of Mt. Aetna, southeast of Hagerstown in Washington County, Maryland. The buildings are situated on a ridge and face east, overlooking Beaver Creek, at this point quite small, and Maryland Route 66.

The house is a two story five bay stone structure sheathed with stucco. An arch topped date stone is located in the south gable, but no inscription could be seen on it.

Windows and doors appear to be aligned with each other in the walls. Most windows have narrow frames finished with a bead at the inside edge. These may be replacements since they do not match the door frames which are quite wide with joints secured with wooden pegs. First floor windows have nine over six pane sashes while upper story windows have six over six sashes.

The original principal facade appears to have been the east elevation. Now, however, the main entrances are in the west wall, where doors are located at both the first and second story levels. Patching of the masonry around the upper level doors suggests that alterations were made there. These doors do not have transoms.

Sheet metal covers the roof of the house and brick chimneys are located inside the end walls with a third chimney extending from the interior of the house near its center.

Just to the south is a frame bank barn. East of it is a frame hog barn with a large semi-circular fan light in its south gable. This architectural element was presumably reused from another structure. The property contains 103.396 acres. The buildings are in deteriorated to fair condition.
